Bioinformatics Research User Story Map

User Activity	FIND TOOLS		USE TOOLS			SCALE TOOLS	
User Task	Search for bioinformatics scripts or tools	Understand time cost to test run (quality)	EASY BUTTON	Run in Jupyter	Configure 1. My Data 2. Reference Data	Estimate Cost	Estimate Time
First Release	Search by keyword	See Ranking Search Results	Example params	Automatic environment	Tips	Service costs	Execution time
		See Rating (community) "stars"				STOP button	
Second Release	Useful Template Metadata	Searchable Broad Workflow Repo	Integrated Help		Modify an existing Workflow	Predictable Scaling	Useful error messages
Third Release	Suggested workflows "you might like" - via ML model		Live Help		Create a Workflow	Auto-generated suggestions to improve workflow cost/time - via ML model
